

YOUR REPORT

Now we know you'd rather be a Collateral Master – over a Collateral Manager. We're here to make collateral management work for you.

Cost

Your current situation

A manual solution means that your resources are not deployed as efficiently as they could be. Your cost is allocated to operational process rather than value creation or risk reduction.

Your estimated cost savings would be up to

10%

Reduce Cost with CloudMargin

CloudMargin removes manual processes to deliver significant time savings through STP. Your overall cost can be reduced substantially as resources need focus only on exception management.

Risk

Your current situation

Manual processes face significant operational risk. They are prone to human error and failure, with limited controls and audit.

Your current estimated risk profile

High

Reduce Risk with CloudMargin

CloudMargin has a robust, fully automated workflow. With integrated connectivity to AcadiaSoft's MarginManager, audited call management and collateral eligibility checks, CloudMargin gives firms the ability to dramatically reduce your firm's operational and credit risk.

Efficiency

Your current situation

The slow, email-reliant process of a manual solution means too much time is spent processing, and collateral movements are agreed later in the day than they should be.

Your estimated increase in efficiency

80%

Increase collateral efficiency with CloudMargin

With CloudMargin, teams can automate the collateral process from calculation all the way through to settlement instruction via STP. This saves valuable time and also means you are able to allocate your collateral more efficiently and have greater funding transparency so you can manage your assets more effectively.
