

YOUR REPORT

Now we know you'd rather be a Collateral Master – over a Collateral Manager. We're here to make collateral management work for you.

Cost

Your current situation

On-premise solutions are typically expensive to upgrade and maintain. Inflexible upgrades, laborious testing and release programmes, and ongoing support and maintenance lead to significant IT and resourcing costs.

Your estimated cost savings would be up to

60%

Reduce Cost with CloudMargin

CloudMargin is a single-instance platform, built on microservices architecture – via the cloud. No installation is required, upgrades are seamless, and all maintenance and support is provided as part of the subscription fee – enabling firms to achieve substantial cost savings.

Risk

Your current situation

On-premise solutions face multiple security, risk and scalability issues. Vendor software requires frequent upgrades and maintenance patches whilst security and scalability are managed by internal teams with limited resources.

Your current estimated risk profile

Medium

Reduce Risk with CloudMargin

CloudMargin's PaaS uses AWS and best infosec practices to ensure that your collateral management process is secure every step of the way. Most of the largest financial firms are on AWS, so you'll be in the best company.

Efficiency

Your current situation

Product class margining (OTC/Cleared/ETD/Repo) tends to be bifurcated, with corresponding processes and reporting disjointed. Collateral allocation and funding processes are often suboptimal – whilst significant IT and ops resources have to be allocated to maintenance, upgrades and testing.

Your estimated increase in efficiency

40%

Increase collateral efficiency with CloudMargin

CloudMargin gives you the ability to work from one global platform across multiple locations and to have a single workflow and centralised view across all products. STP and optimisation preferences can be set by product and agreement and applied across collateral pools whilst a real-time reporting tool and real-time settlement dashboard give you full transparency.
